## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-51 and 57-79, drawn to a method of improving the size and appearance of a healed wound with a cyclo-oxygenase/NF- $\kappa$ B inhibitor and compositions and kits therefore, classified in class 514, subclass 886.
  - II. Claims 52-56, drawn to a method of improving the size and appearance of a healed wound with an anti-irritant compound, classified in class 424, subclass 443.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not used together and have different modes of operation. The mechanism of the anti-irritant method does not appear to occur through inhibition of cyclo-oxygenase/NF- $\kappa$ B.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1615

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
